

Active Elk River

Monthly Progress Report – September 2019

Multipurpose Facility

September 2-6

- Excavation and fill removal from the site continued as earthwork crews progressed in getting the site up to proper grade. **(1)**
- Utility crews continued to excavate and install the new water line and storm sewer piping. **(2)**
- Mason crews completed blockwork for the Zamboni room and enclosed the area.

September 9-13

- The new water line installation completed.
- Rebar layouts for the multipurpose facility's foundation was laid. **(5)**
- The south end of the site was graded which will become the material staging zone and designated contractor parking area.

September 16-20

- Foundation work continued and pouring of the footings began. **(4)**

September 23-27

- Foundation work is nearing completion!
- Masons began blockwork in the northwest corner which will be the site of new locker rooms. **(3)**
- Masonry work continues for the next few weeks to complete blockwork by late October.

Lion John Weicht Park

September 2-6

- Earthwork crews began milling the existing parking lot.
- Soil correction analyses continued.

September 9-13

- New fill was brought in to perform soil corrections necessary to begin construction of the expanded parking area and new pavilion. **(1)**
- Installation of the new water line underway. **(2)**

September 16-20

- Hauling operations went into full effect to remove saturated, organic soils and replace with new sand fill to support the new parking area and pavilion. **(4)**
- Water and sewer installation continued.

September 23-27

- Parking lot inspection led to a decision to use GeoGrid[®], a soil reinforcement product placed between the sand and asphalt milling sections to improve the sub-base of the parking area.
- Challenging soil conditions found a backhoe in a sticky situation (it was able to get out). **(5)**
- Storm sewer line installation continued.
- Grading of the ballfields and further soil correction work continued at the pavilion site. **(3)**

Thank you for your continued interest in the Active Elk River, a comprehensive plan to reinvest in the city's recreational facilities, major parks, and most significant natural/outdoor resources.
